

*Semalytix is a fast growing start-up specialised in developing Software-as-a-Service products for explaining the global conversation around Competitive Intelligence topics in the Pharma domain. Our AI solutions extract insights from large amounts of textual data in real time to support our customers in making decisions at the operational and strategic level much faster, more informed and much easier – on the solid base of Machine Learning, Natural Language Processing and Knowledge Graphs.*

**We offer:**

- A young and motivated international and diverse team with individuals from more than 20 different nations
- The spirit and culture of a fast-paced and dynamic start-up in a collaborative working environment
- An open culture and friendly working atmosphere
- Sponsored gym membership
- Regular company events

**In order to support our IT Architecture Team, we are seeking  
as soon as possible  
full-time (37.5 hours per week)**

## **System Administrator (m/f/d)**

**Your responsibilities:**

- Dockerisation of server infrastructure
- Streamline patch management
- Define interface security
- Internal risk assessments
- Assist in IT asset management

In your life as a System Administrator at Semalytix you will work with Docker and Linux, but also with AWS and Atlassian tools (Jira, Confluence) on a regular basis. Your daily working hours will be clearly defined and agreed on with the rest of the team.

**Your skills and qualifications:**

- Business fluent in English (German is a plus)
- 3+ years work experience as a Network or System Administrator
- Docker experience
- Linux experience
- Background in programming, computer science, or similar (no scientific degree required)
- Hands-on work attitude
- Excellent verbal and written communication skills
- Excellent analytical and interpersonal skills
- Affinity for backend work
- Specialisation in IT system integration

**Nice to have:**

- Experience with cloud resources, e.g. AWS
- Experience with microservice architecture
- Affiliation with firewall rules and networking
- Experience with Ansible, TeamCity, or Kubernetes
- Experience with single sign-on (SAML2)
- Docker certifications
- Ability to think outside the box and reach creative solutions

Your future team will be Olli, Daniel, Torben, Andy, Verena, and Podi:

*„All of us are lazy, so we try to automatise as much as possible. To us, new problems satisfy our curious and creative minds and are a great opportunity to demonstrate this laziness to everyone. We find that doing things twice is boring, so we try to get them right from the beginning. However, we are also open about our mistakes and use errors as an opportunity to learn. In addition, we all share a passion for neatly packed Docker containers.*

*We do not need many words for communication - our humour speaks for itself and we occasionally troll each other in a loving way - this includes you, so be prepared!*

*In our daily work we dive beyond the frontend surface deep into the backend, so there is no room for superficial judgments based on your appearance. We are so diverse, we even have a dog in our team! As long as you are a skilled and passionate problem-solver you will be welcome!“*

### **How to apply:**

Please apply to [careers@semalytix.com](mailto:careers@semalytix.com).

Your application documents (in English) should include a letter of motivation, CV, relevant certificates and references in one single PDF document.

Informal inquiries may be directed to Katharina Wendler ([katharina.wendler@semalytix.de](mailto:katharina.wendler@semalytix.de)). Positions remain open until filled. We are strongly committed to promoting equal opportunity and diversity in our team - please apply without sending a picture or stating your age.
