

Meet Semalytix: We are the world leader in generating action-ready insights for pharma businesses. Our AI-driven intelligence platform transforms large amounts of unstructured text into real-world evidence – in real time. We identify trends and key learnings, then summarize them transparently. Our goal is to create real value for our customers. We support them with strategic information that enables them to make their decisions easier and faster.

WE OFFER

- A young, dynamic, and motivated international team with roots in more than 20 nations
- An open and flexible culture and a highly collaborative work environment
- Interesting and diverse responsibilities
- The spirit and culture of a fast-paced, dynamic start-up
- Sponsored gym membership

TO SUPPORT OUR IT ARCHITECTURE TEAM (FULLTIME) IN BIELEFELD, NORTH-RHINE-WESTPHALIA, GERMANY WE ARE SEEKING A SYSTEM ADMINISTRATOR (m/f/d)

In your life as a System Administrator at Semalytix you will work with Docker and Linux, but also with AWS and Atlassian tools (Jira, Confluence) on a regular basis. Your daily working hours will be clearly defined and agreed on with the rest of the team.

YOUR RESPONSIBILITIES

- Operate and maintain Cloud-based infrastructure
- Streamline patch management
- Automate builds and deployments using Ansible and TeamCity
- Maintain asset management and technical documentation

YOUR FUTURE TEAM

Olli, Torben, Andy, Leonardo, Tyron, and Verena

"All of us are lazy, so we try to automatise as much as possible. To us, new problems satisfy our curious and creative minds and are a great opportunity to demonstrate this laziness to everyone. We find that doing things twice is boring, so we try to get them right from the beginning. However, we are also open about our mistakes and use errors as an opportunity to learn. In addition, we all share a passion for neatly packed Docker containers. In our daily work we dive beyond the frontend surface deep into the backend, so there is no room for superficial judgments based on your appearance. As long as you are a skilled and passionate problem-solver you will be welcome!"

YOUR SKILLS AND QUALIFICATIONS

- Business fluent in English (German is a plus)
- 3+ years work experience as a Network or System Administrator
- Docker and Linux experience
- Background in programming, computer science, or similar (no scientific degree required)
- Hands-on work attitude
- Excellent verbal and written communication skills
- Affinity for backend work
- Specialisation in IT system integration
- Experience with cloud resources, e.g. AWS

Please send your application to careers@semalytix.com. Documents (in English) should include a letter of motivation, a CV, relevant certificates, and references in a single PDF. Positions remain open until filled. We are strongly committed to promoting equal opportunity and diversity in our team.
